

# Walking Trails

- 1 Stanzertaler loop (18-km round trip):** A relatively flat walk along the edge of the river, through Pettneu toward Schnann. On particularly cold days, a spectacular natural phenomenon can be experienced here. The older bushes alongside the Rosanna become covered in ice crystals that sparkle beautifully in the sunlight.
- 2 Gallery (3 km):** Follow the "Rosannaweg" path, then head slightly uphill to the ventilation shaft of the road tunnel. Fantastic views over the St. Jakob area can be enjoyed from this vantage point. Various winter walking trails can be joined from here.
- 3 Verwall (10-km round trip):** Take the old "Arlbergstraße" street to the Hotel Mooserkreuz, heading steeply uphill (we recommend using the ski bus to the end of the old Arlbergstraße). From there, on almost flat terrain you have the possibility of walking to the Rasthaus Ferwall (roadhouse) or enjoying the panoramic walking trail around Verwall lake. This walk may easily become a highlight of your winter holiday.
- 4 Around St. Anton am Arlberg (2.5 km):** A very easy loop that presents St. Anton am Arlberg from various perspectives.
- 5 Rodelhütte – tobogganing hut (7-km round trip):** Walk along the old railroad line to the cable car station in Nasserein, then head steeply uphill to the end of the "Nassereinerstraße" street. From here it is a quite strenuous uphill ascent (over 200 metres in elevation) to the toboggan run. Fantastic views over St. Anton am Arlberg and the "Stanzertal" valley can be enjoyed from here.
- 6 Jakobusweg (7-km round trip):** The constant up and down hill sections are what makes this walk interesting. Proceed on the sunny side of the "Stanzertal" valley, parts of which follow along the famous St. James' pilgrimage trail. Connecting with other trails is possible.
- 7 Ganderau (3 km):** Plain walking path around St. Jakob.
- 8 Pettneu via Vadiesen (12-km round trip):** Follow the "Jakobusweg" trail to St. Jakob, walking along the "Dorfstraße" street to the "Untergand" area and to the neighbouring village of Pettneu. To return, walk along the "Rosannaweg" path directly beside the Rosanna river.
- 9 St. Christoph (2.5 km):** Ridgeway at 1800 m. The Alpine trail begins at the "Arlberg Thaja" at the elevation of the Arlberg pass. It runs parallel to the cross country trail.
- 10 Reit (2 km):** Sunny, flat loop on the outskirts of Pettneu.
- 11 Kunstmeile (1 km):** From the ARLBERG-well.com centre to the cable car station in Nasserein.
- 12 "Planie" loop (2.5 km):** Walk from the Tourist Office through the park, passing the ARLBERG-well.com centre and along the
